

1/14/13

Call at 11 to prep for tomorrow

Stm, Rob, Bill Kotu, Ray, Stephanie

Ray + Steph meeting at noon - dining out early

11:15 team to go out

Rob says everyone is coming tomorrow. Also, Stanton  
said to DiMaggio that it would be helpful if Scagnelli  
stopped pushing the backflow numbers

Meeting prep call

DiMaggio - Commissioner of Parks + Recreation

Very pleasant - ~~to~~

They are concerned about post-Sandy sampling.

Will it be safe to play Little League in March

They are not concerned w/ recreational booking because

They don't sponsor booking

Talked about odors

access - CRP not going to stage in park

Canby offered space in county park

Ver Kistner

According to Matt Stanton

CRP did talk about documentation concerning Drake

Also Scagnelli discussed that his participation

is not helpful

DiMaggio will be present tomorrow.

Staging - CRP told contractors to prepare bids assuming

no staging in Jynckhurst

Ray - is it a definite that access/staging not req'd.

CPL - yes

Also - we used a precedent to do this from river and field facilities

Ray - we going to use fire dept conditions?

CPL - No

Ray - Good - the less we need to rely on Lyndhurst the better.

CPL - Can use the Parkfield facilities

Ray - Athletic field sampling. We already have sampled, but this is not the way the Agency is handling sandy response. After cleanup, ~~and~~ again Ray did his own project but post-Sandy we are handling more holistically.

Agency - if we are to do sampling, we would have to go through Sandy protocol.

We sampled twice in that area, and town also sampled. No problems. Some people say the stream was different.

(?)

Would CPL be willing to conduct field sampling in park - before & after? Sort of like Tiera sampling byland monitoring facility. Establish baseline so that if there is high water during normal, can show it was +  
normal

Ray - Have EPA already established baseline?

Ray Could say that. EPA just sees this as protection of UPL

Rob We are not using the Park so we were not planning to sample

Ray Just throwing it out there.

Tony DeCandia @ Bergen County. He says he has been getting pressure to sample. He's not in favor of it and wondered what

Bill Potts County started reconstruction of fields. Only untruncated fields are Township fields

Ray Asked township for map of elevation of banks. There are many issues related to fill and raising bank.

Rob We had architect look at work that could do some softening, maybe address  
- looking at design construction that could address flooding. Would be aesthetically pleasing  
- group doesn't necessarily agree

Ray Can you get the group to say yes or no

SK That statement made to group but

→ This is totally separate from RM 10.9 dredging  
→ Changing banks will involve COE - work on side of  
CFRCLA. We don't want to get involved w/ changing  
elevation up and down river. COE has been studying  
local conditions for 100 years

Bill Hyatt - Primary focus is protection schedule

Roy - Involvement is going to teen up

the <

CPG Stan made repeated attempts to get info:  
location, size, of pipes  
→ relations to main impossible to understand  
→ looks like only few are even in proximity  
to dredge footprint

Scagnelli may not know?

Nab told Scagnelli he was missing  
info. Scagnelli said he would call Hyatt  
but hasn't done so.

Security - keep off duty syndicate cops  
to be present in Park, protect

Pump station - totally enclosed - no way  
↳ walk from present already installed
